

## Order confirmation

In addition to confirming an order, it is possible to receive a digital order confirmation from some suppliers. This is yet another nexMart service for simplifying processes. The format you receive is compatible with all participating manufacturers and can be read by your system.

Its content corresponds to your familiar printed order confirmation, but can be imported into your ERP. This gives you a fast and easy overview of the goods you have ordered.

- When will the goods arrive?
- Which articles cannot be delivered at the moment?
- How many articles can be delivered now and when will I receive the rest?

The required information is available more quickly making it easier for you to do your planning.

In addition, the digital order confirmation is a document that is confirmed by the supplier and will be transmitted directly from their system. Naturally, you can still receive your printed order confirmation by regular post.

The format documentation for setup is available from the Downloads section.

Just contact us; we will support you with integrating order confirmation with your ERP.

*Note:* Order confirmation is an advanced nexMart service. It requires you to sign the corresponding terms and conditions of use. These are available as usual from the Downloads section.

**Status:** Submission currently possible with the following suppliers:

- Bosch
- Fischer Befestigungssysteme

Further suppliers on request.
