nexMart – the all-round talent for electronic buying and selling

nexMart is a modern ordering platform for the entire tools and fittings industry. In Germany, Austria, Switzerland, Belgium, Netherlands, Luxemburg, Portugal and Spain over 3000 specialised dealers get electronic access to the catalogues and order systems of more than 90 suppliers via nexMart. With only one password they get better information about their deliveries on the spot and thus nexMart can help to reduce processing costs.

The easiest way to order through nexMart is directly via your merchandise management system. Instead of faxing or calling, simply use nexMart for transmitting your order - digitally, error free, comfortably and fast. The system only needs to be configured once to allow access to all your suppliers on nexMart.

General information about the connection of your EDP system to nexMart can be found [▶ here](#)

Is your address data correct?

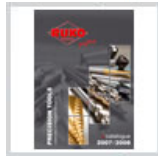

**Do you get order confirmations via e-mail?
Do you get the nexMart newsletter with information about new sellers?**

If not, verify your recorded e-mail address: After logging in click <PORTAL> | <SETTINGS> | <DATA>. At "e-mail (direct)" you will find your stated e-mail address.

With your right e-mail address you will get all important information regarding nexMart easily. If your seller activates you for his catalogue, you'll get an information via email. Additionally you'll get order-confirmations which makes filing very easy.

Ruko

RUKO is a specialist for metal boring tools. Orientated to the requirements of professional users, RUKO offers an extensive, competent range of products. The flexible structure of the organisation and production process allows the economic manufacture of industrial scale series as well as special tools and customised products.
