

ERP Connect / push Connect

Manufacturers

Regular information updates

With push Connect, you, as a manufacturer, ensure that your retailers can always access the latest sales-related information – availabilities, delivery dates, individual prices, promotional prices and product information. It's really simple. You use the basic Setup ERP Connect interface to send regular (e.g. hourly) updates from your ERP system to nexmart. As retailers send their enquiries directly to us, we can then provide them with the up-to-date information they need.

Features at a glance

- Make your latest sales-related information available:
 - Availabilities
 - Delivery dates
 - Individual prices

Your benefits

- Your retailers are provided with up-to-date information
- Your sales revenues are boosted
- Your process efficiency increases
- Your workload decreases
- Product and availability at a glance
