Product and availability in real time

With realtime Connect, you, as a manufacturer, ensure that your retailers can access a large amount of sales-related information in real time: Availabilities, delivery dates, individual prices, promotional prices and product information. It's really simple. Enquiries from retailers are sent directly to nexmart. Using the basic Setup interface, we can directly retrieve the information they need from your ERP system. We then send the details back to the retailers.

Features at a glance

- Make information available in real time:
  - Availabilities
  - Delivery dates
  - Individual prices
  - Promotional prices
  - Product information

Your benefits

- Your retailers are provided with up-to-date information
- Your sales revenues are boosted
- Your process efficiency increases
- Your workload decreases
